Tips & Hints

- Create your next/first job for the collection day onboard as far in advance of your proceeding into the **Forest/Loading Area** as is possible – recommended minimum of **15 mins** before you hit the **Forest/Loading Area**
- Ensure that you are in good mobile phone reception when you are creating a job onboard
- If you ever need to be on Coillte property without a job/permit onboard, you must notify us in advance of entering the given property by sending us a text on the device

Security Alerts

Types Breach Investigations

Customer Mismatch

Unverified PTO usage
while on route to the
customer

Forest Mismatch

Truck is at different HU
(Harvest Unit) than the
one specified on their
Job

No Job

No Job on your device or
prior notification that
you are entering Coillte
property without a Job

Security, Geofence & Job Statusing

- A geofence is a virtual perimeter which is linked to GPS-linked mapping data for Coillte properties and customers. It interacts with the GPS antenna with your ORBCOMM device
- It allows us to move your job through the various phases that it needs to go through in order to appear on whatever customer you are going to
- It also serves as part of the **Smart Timber Security** Package. As your truck passes a geofence around a forest, queries are sent out to your device, ascertaining whether there is a valid job on the system
